

# DOWNSTREAM

RELIABLE EXPERTS | RELIABLE RESULTS

## Pro Bono Program

Pro Bono programs are often offered exclusively by law firms and business consultants; however, small businesses can also offer their services to deserving people and groups. At Downstream, we believe that technology should benefit all, and we are committed to using our knowledge and expertise to help people in the community.

Every day, many income-insecure people face legal problems and are not able to retain an attorney. We would like to help in a small way by offering our digital forensic resources to aid in legal proceedings.

The [Downstream Pro Bono Program](#) has been established to offer our specific skills in digital forensic services to individuals of limited financial means, and to charitable organizations.

### Civil Disputes

We will assist in private disputes and other non-criminal disputes that could go to court, including breach of contract, defamation, employment issues, family issues.

### Criminal Disputes

We will assist in criminal proceedings that are specifically related to distracted driving accidents that occur while using a mobile phone.

---

### Eligibility Criteria

There are four key considerations for establishing eligibility

-  Status of the applicant
-  Financial eligibility
-  Merit
-  Nature of the proceeding
