

StremView's cloud-based analysis and investigation platform was developed with mobile device data specifically in mind.

What People are Saying

Downstream excels in providing unique solutions for mobile device collections and StremView promises to be exactly what is needed for reviewing mobile data. Finally, we have the right tool for the job!

Director, Client Services

Purpose-built in Microsoft Azure*, StremView was developed for speed, scalability, and data security in mind. We have taken advantage of the latest cloud-based security framework and technology to provide our customers with a unique experience.

**In good company with eBay, Walmart, and Meta in Azure*

REVIEWING MOBILE DEVICE DATA

StremView features lightning-fast, future-ready AI and analytics capabilities for reviewing mobile device data. Effectively search and cull large amounts of mobile data faster. Tag targeted responsive records for transfer to any format for Relativity and non-Relativity platforms

With custom threading, view conversations in context as if they were still on the phone. View native images, videos, audio files and other native files inline. Take advantage of

- Analytic indexes
- Interactive timelines
- Concept searches
- Searchable word and *emoji* clouds
- Heat Map
- Geo Location tracking

Deployed as multi-or dedicated tenant without any geographical restrictions, StremView ensures 100% compliance with any data protection and privacy regulations, regardless of deployment location.

Seamless integration with DataStream, Downstream's virtual project management platform, StremView provides comprehensive, real-time insight into virtually every aspect of a given project.
